

Garrya Tongsai Bay Samui Organic Garden

Welcome to Garrya Tongsai Bay Samui Organic Garden!

Since 2003, as a part of our environmental initiatives “Green Project” we have been practicing the following sustainability activities in our 8,000 square meter garden:.

- Growing vegetables and herbs, as well as flowers and plants to be utilized in our resort.
- Recycling leftover food from our outlets is used to make:
 - Fruit extracts for toilet cleaner
 - Vegetable extracts for odor elimination
 - Fish emulsion fertilizer
- Producing distilled citronella extract
- Propagating plants by with the “layering” method
- Producing organic fertilizer from leftover food from our FB outlets
- Producing our own charcoal from old wood or dead trees

Please note that the organic garden tour is available upon your request. Please kindly contact the Sustainability Desk in the lobby.

From the garden to our resort

Some of the raw products that are used at our resort are harvested at our organic garden. This enables us to reduce our carbon footprint and we can provide our guest with fresh & healthy ingredients.

Homemade mulberry jam for breakfast

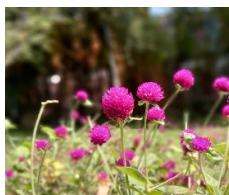

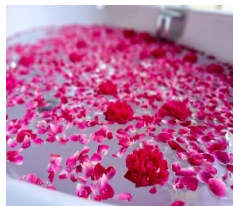

Lemongrass straws to reduce the single use of plastic in the resort

Various kinds of vegetable for wellbeing dishes in our outlets

Rose & Amaranth for celebrating honeymooners & anniversary guest

Other key sustainable activities at our garden

Producing extract from leftover food with effective microorganisms

- Fruit extracts for toilet cleaner
- Vegetable extracts for odor elimination
- Fish emulsion fertilizer

“Layering” - Tree propagation

Peel the brunch bark and attach a bag of soil. The roots grow inside the bag and this brunch becomes a mother tree later on.

Producing distilled citronella extract with a used AC compressor from the guest room

Organic fertilizer is produced by mixing leftover food from the outlet, branches and leaves. By adding effective Microorganisms, it helps making processes faster.

Grow with our organic fertilizer

Mulberry

Jack Fruits

Galangal

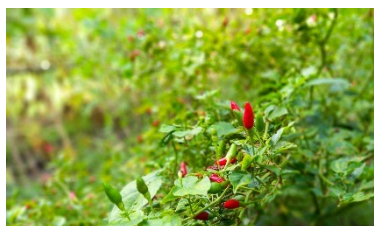

Lemongrass

Kaffir Lime

Egg Plant

Chili

Watercress

Damask Rose

Mango

Rosemary

Heliconia

Banana
